

## SINOWAY Newsletter

September, 2022

### ☆Market information

#### Transportation

1. Recently, the sea freight of major international routes including China main port to Europe, America, South America main ports have been reduced by about 5% ~ 10%. Mainly due to the impact of the global economy, the world demand is weak, which caused the pressure for shipping companies to compete to fill the shipping space.

2. According to the latest data released by Drewry on Sep.16, in recent five weeks (week 38-42), the global Sanda shipping alliance has successively cancelled a total of 101 voyages, which may cause the future freight rates fluctuate slightly

3. Recently, major international ports such as Hamburg have been congested due to the strike operation, which caused the arrival time has been prolonged. At the same time, due to the global economic downturn caused by inflation, currency depreciation, etc., kindly consider above special situation to reduce the risk before arranging the shipment.

#### Event:

1. On October 16th 2022, the 20th National Congress of the Chinese Communist Party will be held in Beijing. We hope the restriction regulation will be relieved after the event.

2. API (Qingdao) exhibition has been postponed to Nov.09~11, 2022

3. CPhI Shanghai will be held in Dec.20~22 in SNIEC (Shanghai New International Expo Centre)

4. China will have national holiday from Oct. 01 to Oct. 07. The production and the shipment about before and after the holiday may be influenced due to long holiday

### ☆New Products Recommendation

This month, here we introduce a nice series product: **Carfilzomib intermediates.**

**API : Carfilzomib, CAS No: 868540-17-4 ( \*In the patent period, for R&D use only )**

**API Usage:** For the treatment of multiple myeloma (MM)

#### Advantages:

1) We can provide API and its intermediates in every step in commercial scale with high quality. (Purity 99% up, Single impurity 0.1% below by HPLC)

2) Big production capacity. (100kgs ~10mt/month depending on different

intermediates)

3) We can support the customer to prepare the technical documents for registration purpose.

4) The most regular intermediates supplied for your reference.

<b>Chemical name</b>	<b>CAS No.</b>	<b>Quality</b>
(alphaS)-alpha-[(4-Morpholinylacetyl)amino]benzenebutanoyl-L-leucyl-L-phenylalanine	868540-16-3 (N-1)	99.00% up by HPLC
(2S)-2-Amino-4-methyl-1-[(2R)-2-methyloxiranyl]-1-pentanone trifluoroacetate	247068-85-5 (N-1)	Single impurity: NMT 0.1%.
(alphaS)-alpha-[[1,1-Dimethylethoxy)carbonyl]amino]benzenebutanoyl-L-leucyl-L-phenylalanine phenylmethyl ester	868540-15-2 (N-3)	Total impurities: NMT 0.5%.

\*Products can only be available in the area without patent issue
